

Project no.: 0044096
Project acronym: EFI+

Improvement and spatial extension of the European Fish Index

Instrument: STREP

Thematic Priority: Scientific Support to Policies (SSP) - POLICIES-1.5

D 6.2 – Project website

Due date of deliverable: 28.02.2007

Actual submission date: 12.04.2007

Start date of project: 01.01.2007

Duration: 24 Month

Organisation name of lead contractor for this deliverable:

**Institute of HYDROBIOLOGY and AQUATIC ECOSYSTEM MANAGEMENT
Department of WATER, ATMOSPHERE and ENVIRONMENT
BOKU - UNIVERSITY of NATURAL RESOURCES and APPLIED LIFE SCIENCES**

Revision [draft 1]

Project co-funded by the European Commission within the Sixth Framework Programme (2002-2006)		
Dissemination Level		
PU	Public	X
PP	Restricted to other programme participants (including the Commission Services)	
RE	Restricted to a group specified by the consortium (including the Commission Services)	
CO	Confidential, only for members of the consortium (including the Commission Services)

Deliverable 6.2 –Project website

The purpose of this document is to formally notify the European Commission of the first launch and the initial content of the EFI+ website and internal communication tool.

The relevant domains are:

<http://efi-plus.boku.ac.at>, the EFI+ public website

<http://efi-plus.boku.ac.at/phprojekt>, the password protected internal communication tool of the project, only available to authorised users.

Public website

The EFI+ public website provides a description of the project, timetable, recent developments and gives a brief explanation of the various sections.

Title: **Improvement and Spatial extension of the European Fish Index (EFI+)**

Chapters:

- Project Description (Sub-chapters: Summary, Workpackages, Timetable)
- Partners (Sub-chapters: EFI+ Consortium, Supporting Partners/Institutions, Advisory group/External evaluators)
- News
- Download (Sub-chapters: European Fish Index EFI, during the project: project results, Newsletter)
- Photogallery

The objective of the website is to disseminate the results of the EFI+ project and to make the benefits and achievements known to two relevant target groups:

- a) stakeholder groups and all people from water management institutions who are directly involved in the implementation of the WFD,
- b) other parties involved and interested in the implementation of water framework directive.

Improvement and Spatial extension of the European Fish Index (EFI+)

A specific targeted research project supported by the European Commission under FP 6 contributing to the implementation of task “Ecological Status Assessment - filling the gaps” (Priority “Integrating and Strengthening the European Research Area - Scientific Support to Policies”, Task 4)

Contract Number 044096.

© 2007 by EFI+ • [contact](#) Internal Communication

Internal communication tool

The internal communication tool was established to enable a smooth information exchange between the members of the FEI+ consortium and other people linked to the project, as e.g. the advisory group. The password protected area can be accessed via <http://efi-plus.boku.ac.at/phprojekt> or directly via the FEI+ webpage (link in the blue bar on the bottom right side).

PHProjekt - a groupware tool

The used tool is called PHP-project and is an open source free groupware suite, with modular application for the coordination of group activities and to share informations and document via the web.

Php-project is usable over the internet or via Intranet environment. Relevant components of PHP project for FEI+ are filemanager and forum.

PHP rojekt is a “client-server application” and needs a web server with a php-parser (e.g. Apache) and a SQL-compatible database (e.g. MySql). All these facilities are hosted and administrated at the University of Natural Resources and Applied Life Sciences, Vienna (FEI+ partner 1).

The private area is only visible to authorised visitors when they have logged in, and the actual information available to each site visitor depends on his/her individual access rights.

Therefore, 3 different user-groups have been defined:

EFIPLUS_CONSORTIUM: only partners of the project.

ADVISORY_GROUP: all members of advisory group.

ALL: contains all partners and all members of advisory group.

In addition, individual access-rights only for some persons are possible to define.

Summary and prospects of the website

The EFI+ website and the internal communication tool have been created within the first months of the project. The website is providing information about the EFI+ project, partners, publications, upcoming events and other issues. The internal communication tool is the main file storage and access point for project-related information, for use by the project partners and the advisory group.

After the first launch, the website will be updated regularly. In particular, all relevant documents for partners will be made available through the filemanager section of the internal communication tool, publicly-available deliverables will be published in the download section of the public website.

As the technical work and activities progress, new items will be published under the “News” section.

Newsletter

In addition to the launch of public website and internal communication tool, the first EFI+ newsletter has been prepared and sent out to project partners, the project advisory group, the EIFAC-network, the WFD- Intercalibration group and some other persons and institutions interested in the project.

The newsletter will also be available in download section of the homepage soon.
